

Technology Request

Title:

Innovative waste water treatment technologies (Ref: 09 BE 0427 3FRC)

Abstract:

A Flemish SME specialized in PE plastics rotation moulding and currently active in the waste water treatment industry and diesel tank production is looking to broaden its product offer. The SME is looking for new technologies in the field of the waste water industry such as biorotors, filter beds....

The company is looking for licensing agreement and/or co development.

Description:

A Flemish SME specialized in manufacturing and commercialisation of water tanks, decentralized waste water treatment systems, separators, grease traps and diesel tanks, all based on rotation moulded tanks in Polyethylene is looking for novelties in the waste water treatment industry. Thanks to their unique expertise and know-how they have been market leader (Benelux and European ambition) of polyethylene rotational moulding for more than 30 years now. The company wants to extend his portfolio in the field of waste water treatment and are interested in companies and research groups who have developed innovative products in this field. Possible technologies of interest are fosfate removal, compact biorotors, filter beds,...or any new technology for this field of applications. The company is looking for licensing agreement and/or co-development. They are also interested in exchanging know-how regarding waste water treatment.

Technical Specifications / Specific technical requirements of the request

The technologies sought have to be alternative and innovative technologies for treatment of (waste) waters, for decentralized applications.

Current and Potential Domain of Application

waste water treatment industry

List of Keywords

Technology

- Design and Modelling / Prototypes
- Environmental Engineering / Technology
- Water Pollution / Treatment

Market

Collaboration Type

- License Agreement
- Joint further development

Comments

- Type of partner sought: industry/research
- Specific area of activity of the partner:
waste water treatment
- Task to be performed by the partner sought: The company is looking for licensing agreements and exchanging know-how
